**Subject:** Orchard View Rd. Yield Sign

All,

Dr. Erik Swensson visited the RIAC meeting last night and expressed concern for some traffic control at the intersection of Orchard View and High Heaven roads. With increased traffic in recent years coupled with the recent asphalt overlay on the lower section of Orchard View the road has become the most desirable route to reach Baker Creek Road for residents living on upper High Heaven Rd. Both roads only have a traffic count around the 100 ADT mark. However when two meet there at the same time there can be some confusion as to who has the right of way. I propose posting a yield sign for traffic departing Orchard View onto High Heaven.

Thanks for your consideration.

Bill
