WHEREAS, this Ordinance would be in the best interests of the citizens of Yamhill County, NOW THEREFORE

THE BOARD OF COMMISSIONERS FOR YAMHILL COUNTY ORDAINS AS FOLLOWS:

SECTION 1

1.01 TITLE - This Ordinance shall be known as the Yamhill County Rural Addressing Ordinance.

1.02 PURPOSE - To establish a building address system for Yamhill County to designate structural location to minimize the response times of fire, life-saving and other emergency vehicles in emergency situations; to facilitate rural delivery while providing for greater public convenience.

1.03 SCOPE - The addressing system of this Ordinance, as set forth in Sections 2 and 3 thereof, shall provide for the extension of existing city addressing systems beyond urban growth boundaries, where necessary or appropriate. The County rural addressing system shall not be applied within existing urban growth boundaries, except where necessitated by the absence of Comprehensive city addressing systems. In no case shall persons continue under the existing system of rural route and box number outside the corporate limits of any city.

SECTION 2

2.01 DEFINITIONS- The following definitions shall apply to the provisions of this Ordinance:

Baseline: shall mean either of those lines running north and south or east and west, dividing Yamhill County into four quadrants, more particularly described as follows:

- a) The North-South baseline shall be described as follows: Beginning at the point of intersection of the Southerly boundary line of Yamhill County with the centerline of U.S. Highway 99W; thence along said centerline in a northerly and easterly direction to its intersection with the centerline with State Secondary Highway 47; thence along the centerline of said Highway 47 in a northerly direction to its intersection with the Northerly boundary of Yamhill County.

- b) The East-West baseline shall be described as follows: Beginning at the point of intersection of the Westerly boundary line of Yamhill County with the Township line between Townships 3 and 4; thence easterly along said Township line to intersection with the centerline of the westerly extension of County Road 485; thence in a generally easterly direction along said centerline and the centerline of Baker Creek Road to its intersection with the Centerline of U.S. Highway 99W; thence in a northerly and easterly direction along said Highway centerline to its intersection with the centerline of Riverwood Road; thence easterly along the centerline of said Riverwood Road to its eastern termini; thence easterly to the Willamette River.

Building: shall mean a structure designed or used for a residence, place of business, or other purpose as may be authorized by County zoning, but does not mean accessory buildings or agricultural structures such as pole barns.

County Road: Shall mean any public road under the jurisdiction of Yamhill County that has been designated and accepted by the Board of Commissioners as a County Road pursuant to ORS Chapter 368.

Local Access Road: Shall mean any public road under the jurisdiction of Yamhill County which has not been designated a County road.

Official Road Name Map: Shall mean that County Road Map published by the County Road Department, dated March, 1982, and any subsequent revisions thereto.

Private Road: Shall mean any road not dedicated to the public over which private interests exercise control.

2.02 NUMBERING SYSTEM - All buildings receiving addresses shall be numbered in accordance with the following system of numbering which is hereby designated the Yamhill County Addressing System:

- a) All numbering shall be established in accordance with the quadrant and numbering system shown on the attached map and labeled Exhibit "A" and by this reference incorporated herein. The roads upon which the major axis lies within 45 degrees of North or South shall be assigned numbers which increase or decrease in a northerly or southerly direction. In a likewise manner, roads upon which the major axis lies within 45 degrees of east or west shall be assigned numbers which increase or decrease in an easterly or westerly direction. As a given road is traversed in a direction which increases the numeric value of addressing (outward from a baseline), even numbers shall be assigned on the right and odd numbers on the left sides of the roads respectively.
- b) The numbering system shall include 37.88 potential numbers for every 100 feet of distance along a road, providing 2000 numbers per mile.
- c) Individual address assignments shall be based upon addressing maps which will be prepared in accordance with this Ordinance by the Planning and Development Department and updated as required.

### SECTION 3

The Director shall give notice to the owners and/or occupants of all buildings receiving new addresses.

3.02 DISPLAY OF NUMBERS - The Planning Director shall establish rules regulating the type, location and placement of address numbers issued pursuant to this Ordinance. Said rules shall be effective upon the filing of the same with the Board.
