

## Safe Medication Disposal Sites

Never flush medication! Even with our advanced sewer treatment plants and home septic systems, medications are not filtered out and can end up in our water ways. These concentrations of medicine can affect how fish and other species develop and can eventually make its way back into your drinking water.

- Medications can be disposed of year-round at the locations listed below.
- Medications/Prescriptions can be expired or unused.
- Please use a permanent marker to block out names or remove label for privacy.
- Please call the phone number listed with each location for questions.
